1.Market Access Alerts (attach copy of notification):

e. Alerts on customs tariff changes**: -**

Customs duties

Albania uses the Harmonized Code System for tariff classification. The customs duty rates range from 0% to 15%, depending on the type of goods. Import of machinery and equipment for use in the taxpayer's business activity are generally subject to customs duties at the zero rate. Import of vehicles are subject to customs duties at a rate of 0%.

Excise duties

Excise duty is a tax applicable to certain goods consumed in Albania, whether imported or produced in the country. Albanian excise legislation is based on EU Council Directive 2008/118/EC, which defines common provisions applicable for all excisable goods. It also integrates specific provisions applicable for each category of excise products. Categories of products subject to excise duty in Albania are:

- Energy products (e.g. petroleum, gasoil, gas).
- Tobacco products (e.g. tobacco, cigarettes).
- Alcohol and alcoholic beverages (e.g. beer, wine, spirits).
- Other products (e.g. baked coffee, fireworks).

Excise duty is usually calculated as an amount per quantitative measuring unit defined for that product (e.g. per litre, per kilogram, per hectolitre, per 1,000 pieces).
