1.	20.11.2024	<p>The Japanese Industrial Standards (JIS) are a collection of national standards stipulating the criteria for the quality of products, services and so forth in Japan. The Ministry of Economy, Trade and Industry (METI) has been newly establishing and revising these standards in response to societal and technological changes. METI introduces the newly established or revised JIS this month.</p> <p>In December 2024, METI established 1 standard and revised 42 standards.</p> <p>All of these standards are revised standards through the discussion by the Japanese</p>	—	—	—

3. Feedback

1. Feedback from major Indian industries / other commercial concerns and Indian trade visitors to respective country

S. No.	Name of business house	Activity sector	Trade barrier issues if any (incl. HS codes)	General Feedback (Max.200 words)
1.	—	Hospitality	Basmati rice, fresh vegetables, wine	Basmati rice: Currently the duty on rice imported from USA & other countries is very less as compared with Indian basmati rice. Due to the high percentage of duty on Indian basmati rice it is very costly/ expensive compared with other rice. Assuming a very conservative volume of 100 kg per restaurant per month the total consumption of rice per month would be 500

				<p>tonnes & annual consumption would be 6000 tonnes of rice. To make the prices of the rice competitive the Government of Japan is requested to relax the percentage of duty on Indian Basmati rice.</p> <p>Fresh vegetables: Currently Japan does not allow import of many vegetables from India. With such a potential market of 5000 restaurants there is a huge requirement to increase vegetables being exported from India to Japan for the restaurants. Import of vegetables like green chilli, loki, parval, tindora, tindi, dudhi are not allowed. In comparison with other South Asian - EPA countries (with Japan) such as Vietnam, Philippines and Thailand - import duty is higher for India.</p> <p>Wine & other Alcohol: The custom duty charged in case of Indian wines & other alcohol is also higher as compared with the same products of EU countries (no import duty). Indian restaurants in Japan request to allow import of Indian wine & alcohol at reasonable/ competitive import duty.</p>
2.	—	IT	Procurement process	<p>Government procurement process:</p> <p>The size of the IT services market in Japan is more than US\$ 125 billion. The Indian IT firms have less than 2% share despite being present in Japan for over a decade. The Keiretsu model in the IT services market in Japan makes it difficult for Indian IT firms to directly approach customs. Under this model, only the top tier companies, such as Fujitsu, NEC</p>

				<p>and Hitachi work as partners with the clients and then outsource to various small and mid-size providers. As a result, Indian companies often end up as tertiary service providers despite their competitive strengths in this sector. Public sector outsourcing to foreign companies is also negligible, which also limits market access to India IT companies.</p> <p>The process of tendering of projects in Japan is Opaque. Bidders do not understand how companies are selected.</p> <p>Only the top few Japanese companies are selected every time.</p> <p>Top Indian IT firms in Japan end up as outsourcing firms to second level Japanese IT firms, discouraging Indian IT firms to expand their operations in Japan.</p>
