				4) Mr. Pedro Vargas, Elite Ingenieria 5) Mr. Antonio Aníbal Almonte, Constructora Almonte Inoa 6) Mr. Winston Rodríguez, Concepto SRL 7) Mrs. Estrella Sánchez, Ferretería Joselito		Vibrant Buildcom trade show. The vibrant atmosphere and the sheer scale of innovation on display truly left an indelible mark on my professional journey. I would like to take this opportunity to express my sincere gratitude for the warm welcome and the meticulous attention of the entire team during my stay. From the moment I arrived, I felt embraced by the culture and hospitality that India is renowned for. The team went above and beyond to ensure that my experience was seamless and enriching, providing invaluable insights into the local market and its dynamics. Overall, it was a professionally enriching experience, and I learned about the myriad of opportunities and growth that India offers. **Feedback from Mr. Eduardo Bretón.** The recent international construction industry exhibition, Vibrant BuildCon, far exceeded our expectations, consolidating its position as a benchmark event for the industry. High-level exhibitors presented an outstanding range of innovations and products, capturing the attention of professionals and specialized companies from diverse areas of the sector. The variety of solutions on display was remarkable, ranging from sustainable

						construction materials to advanced technology in machinery and automation. Each space at the fair demonstrated a firm commitment to excellence and innovation, allowing those of us who attended to identify comprehensive proposals for the development of our projects. Furthermore, the event's organization placed special emphasis on highlighting the latest trends and advances in the global market. The conferences, panels, and networking spaces promoted an extremely enriching exchange of knowledge, facilitating the creation of strategic links between key industry players. In short, the combination of impeccable organization, a diverse technological offering, and a clear focus on the current needs of the sector made this fair an extremely valuable experience. We undoubtedly hope to participate again in future editions. **Feedback from Mr. Aníbal Almonte.** I would like to thank Mr. Ramu (Ambassador of INDIA in the DR) and all the collaborators of the embassy who gave us excellent support, also to the fine attentions of Pooja and the entire team in New Delhi; I could see a great effort from the Indian government and from the Construction Association that made the

						event a reality, which was very splendor and at an international level, a little small participation of the total number of exhibitors considering that India IN has many suppliers with category for export, this is the first fair and we hope that in the next events more factories and businesses in the construction area participate, in conclusion it seemed to me a very good show and beneficial for the Dominican delegation.

3. On 23 April 2025, SS Com attended the Master conference "Rare Earths" given by Eng. Ramón Albuquerque, and organized by the Dominican Athenaeum Inc (Ateneo Dominicano Inc). We had the opportunity to learn about the geopolitical, economic, and scientific importance of the elements known as rare earths, which are fundamental to technology and the energy transition of the 21st century. Mrs. Betty Vargas, president of the Dominican Athenaeum, welcomed everyone. Guests included Mr. Rafael Vallejo, a

member of the Central Electoral Board, and Mrs. Linda Hernández-Deslauries, Senior Trade Commissioner and Counselor of the Canadian Embassy. China, the United States, Australia, India, and Russia are among the countries with the largest reserves of rare earths. The metals found in rare earths have diverse uses in both medicine and computer science. Among the metals we can mention are cerium, dysprosium, scandium, gadolinium, yttrium, and others. Over the past 18 months, exploration has been underway in the Pedernales region in the southwest of the country, specifically in the Ávila mining reserve, declared a Mining Fiscal Reserve in 2018, to evaluate potential rare earth deposits. The first phase involved collaboration with the University of Barcelona, and the U.S. Army Corps of Engineers was subsequently contracted.
