e) Potential item of imports from India

S No	Commodity (6 Digit HS code)	Rationale (Max 200 words)
1	Engineering Goods	In view of upcoming Infrastructure and energy projects including renewable Energy in Bahrain, there is a considerable scope to increase export of Engineering goods & project exports.
2	Pharmaceuticals (300220)	India's share in Bahrain's pharma market has remained less than 2% of its import. Patented medicines and foreign drug companies dominate the Bahraini pharmaceutical market. However, the generic drug sector is expected to grow as the government is looking to introduce mandatory health insurance scheme and control costs. This provides Indian pharma companies opportunity to make inroads in Bahraini market. Recognition of the Indian Pharmacopoeia (IP) has been taken up by the Mission and the proposed annex to the MoU in Healthcare Sector to promote trade of pharmaceutical products may help in boosting the pharma exports .
3.	Electronic Goods (including mobile phone)	Smartphones are the single largest export items from China to Bahrain which is the largest exporting country to Bahrain. Similarly, other electronic goods constitute important part of Chinese export basket to Bahrain. With India emerging as hub for Smartphones and other electronic goods , there is considerable scope to increase our export of these products to Bahrain.
4	Jewellery of gold (71131910)	Gold jewellery is among top ten import items of Bahrain of which our share in the year 2024 was only 10%. However, considerable amount of Indian jewellery is coming through UAE which captures 54% of Bahraini market. There is scope to increase our direct export to Bahraini market given popularity of Indian designs and craftsmanship.
5	Organic and processed food products	There is considerable scope to increase export of organic food, processed cereals, protein bars, healthy beverages, dairy products etc.
6	Coffee Products	The Coffee market in Bahrain is well positioned for continued growth, driven by growing consumer interest in specialty coffee, sustainable sourcing and home brewing equipment. There is a scope for increased import from India, especially in specialty, single origin Arabica, and value added coffee products. Currently the Mission is conducting a market survey on Coffee products in Bahrain with an objective to increase export

		of coffee products from India to Bahrain. This survey will develop a better understanding for enhancing trade of coffee products from India to Bahrain.
7	Renewable energy products	Bahrain is actively working towards diversifying energy sources, with solar power especially expected to generate up to 1,300 MW by 2040. So there will be a considerable scope to increase the export of renewable energy products and related investments from India to Bahrain.
